

INSTRUCTIONS

ZONING CLASSIFICATION CHANGE (REZONING)/CONDITIONAL USE PERMIT

1. All applicants requesting a change in zoning classification (rezoning) or a Conditional Use Permit should consult the Zoning Administrator prior to submitting a formal application. The purpose of the consultation is to advise the applicant of his rights and responsibilities in the filing of a zoning change or a Conditional Use Permit application.
2. The applicant/agent shall fill out the attached application. The application form shall be completely filled in with the information requested or the notation N/A (Not Applicable).
3. All applications must be accompanied by a list of owners of all property (except public roads and ways) within a one thousand (1,000) foot radius of and including the property for which the zone change or Conditional Use Permit is requested. If such property is located near or adjacent to the limits of an incorporated city, the area shall be a maximum of one thousand (1,000) feet in the unincorporated area and two hundred (200) feet in a city. The list must contain the names and mailing addresses of all the owners of property within the notification area. This list may be obtained from a licensed title company or from the tax records of Reno County. If the property adjoins the County line, the ownership list must include owners into adjoining counties.
4. The application shall be signed by the property owner or his duly authorized agent. If the application is signed by an agent, written authorization from the property owner must be submitted naming the agent and that the owner is aware and approves of the requested zoning change or Conditional Use Permit.
5. The filing fee for a Rezoning/Conditional Use Permit shall be \$300 and paid at the time of filing an application.
6. Applications along with the required ownership list and fee shall be filed in the office of the Zoning Administrator.
7. Requests for a change in zoning district classification shall not include reference to proposed uses, whereas a request for a Conditional Use Permit must specify a specific use. Presentations before the Planning Commission or the Board of County Commissioners on a rezoning should not be based on any specific use, but on the zoning district requested.
8. Submittal of a Development Plan as required in Article 8 of the Zoning Regulations.

REZONING/CONDITIONAL USE PERMIT APPLICATION

This is an application for change of zoning classification (rezoning) or for a Conditional Use Permit. The form must be completed and filed at the office of the Zoning Administrator in accordance with directions on the accompanying instruction sheet.

AN INCOMPLETE APPLICATION CANNOT BE ACCEPTED.

1. Name of applicant or applicants (owner(s) and/or their agent(s)). All owners of all property requested to be rezoned must be listed in this form.

A. Applicant/Owner
Mailing Address
Phone Email

B. Agent
Mailing Address
Phone Email

(Use separate sheet if necessary for names of additional owners/applicants.)

2. The applicant hereby requests

<input type="checkbox"/>	A change of zoning from <input type="text"/> to <input type="text"/> .
<input checked="" type="checkbox"/>	A Conditional Use for the following: <input type="text" value="Wind Energy Conversion System"/>
<input type="text"/>	

3. The property is legally described as (Lot and Block or Metes and Bounds)

See attached.
<input type="text"/>
<input type="text"/>

4. This property address is:

See attached.

The general location is (use appropriate section):

A. At the [] (NW, NE, SW or SE) corner of [] (Road) and [] (Road) or,

B. On the (N, S, E, W) side of (Road) between (Road) and (Road).

5. I request this change in zoning for the following reasons (Do not include reference to proposed uses for a rezoning.) Attach a separate sheet if necessary.

See attached

[illegible]

6. I (We), the applicant(s), acknowledge receipt of the instruction sheet explaining the method of submitting this application. I (We) realize that this application cannot be processed unless it is completely filled in; is accompanied by an ownership list as required in the instruction sheet; and is accompanied by the appropriate fee.

(Owner)

(Owner)

By

Spencer Jenkins

Authorized Agent (if any)

By

Authorized Agent (if any)

OFFICE USE ONLY:

Received by the Zoning Administrator, at _____ (A.M.)(P.M.) on this ____ day of _____,
20____, together with the appropriate fee of \$300.

I. PROJECT INTRODUCTION Reno County Conditional Use Permit Application

Pretty Prairie Wind, LLC ("*Pretty Prairie Wind*"), a Delaware limited liability company, which is wholly owned by NextEra Energy Resources, LLC ("*NextEra Energy Resources*"), a Delaware limited liability company, proposes to construct a wind energy conversion facility, titled the "Pretty Prairie Wind Energy Center" in Reno County, Kansas. The project will include a total of eighty one (81) wind turbine sites and four (4) alternate turbine sites, totaling 220 megawatts (MW). Fifty three (53) of these turbine sites as well as SCADA met tower sites are located within the zoned area of Reno County and are included in this application. The laydown area and the O&M facility are located in the unzoned area of Reno County.

As illustrated throughout this Application, Pretty Prairie Wind has been very diligent in designing a facility which meets the requirements of the Reno County Zoning Ordinance. This project plan includes approximately 170 participating landowners in Reno County, and the permanent facility and turbines will be serviced by approximately 20 miles of new access roads to be constructed by Pretty Prairie Wind.

Pretty Prairie Wind will comply with the general and specific standards and requirements for special land uses as described in the Kansas Planning and Zoning Enabling Act and the Reno County Zoning Ordinance.

Spencer.Jenkins@nee.com

II. WIND ENERGY CONVERSION SYSTEM | Conditional Use Permit Approval Process

Pretty Prairie Wind will conform to all Federal and Kansas statutes and local ordinances including, but not limited to, the Kansas Planning and Zoning Enabling Act, K.S.A. 12-715 through 12-775 which gives Reno County the Authority to adopt a comprehensive plan and enact planning and zoning regulations, including K.S.A. 12-755 that authorizes the adoption of regulations governing the approval of conditional use permits and K.S.A. 12-757 that provides notification requirements to surrounding property owners. Also, Pretty Prairie Wind will comply with K.S.A. Chapter 19, Article 29 governing certain aspects of zoning in Kansas counties to the extent applicable to Reno County. Pretty Prairie Wind will further comply with the procedures outlined in the Reno County Zoning Regulations governing Conditional Use requirements, as described in Article 1-104 § 7 M (Definitions), Article 2-109 (Supplementary Use Regulations), Article 8 (Plan Review Guidelines), Article 15, Sections 101, 102, 105 and 106 (Conditional Uses) and Article 20 (Amendments) of the Reno County Zoning Ordinance.

Pretty Prairie Wind will also comply with the Reno County, Kansas Comprehensive Plan Update (2018 – 2040) “Other Special Land Uses” governing the location and development of Wind Energy Conversion Systems that provides, among other things, that the “location of these facilities should be left to the open marketplace and investment decisions of the developers of such systems to determine the most acceptable locations, with the County retaining the final decision through the Conditional Use Permit approval process.”

1) APPLICANT IDENTIFICATION

Project Developer:
Pretty Prairie Wind, LLC
700 Universe Boulevard
Juno Beach, Florida 33408

PRETTY PRAIRIE WIND ENERGY CENTER
Location:
Reno County, Kansas
See Parcel List located in **Appendix A**

On behalf of the listed participating landowners, the application is submitted by Pretty Prairie Wind, to develop, own, and operate the proposed wind farm. Pretty Prairie Wind is a wholly-owned subsidiary of NextEra Energy Resources that in turn is a wholly-owned subsidiary of NextEra Energy, Inc.

NextEra Energy Resources is North America’s largest producer of wind energy with 120 wind facilities in operation throughout 21 states and Canada, totaling more than 14,000 MW of wind power. *NextEra Energy Resources* added over 1,200 MW of new wind generation to its portfolio in 2018. Currently, *NextEra Energy Resources’* portfolio of facilities totals 19,000 net megawatts of generating capacity from power plants operating in 32 states and Canada.

2) PROJECT DESCRIPTION

Pretty Prairie Wind proposes to construct this wind energy facility, titled the “Pretty Prairie Wind Energy Center” in Reno County, Kansas.

Approximately 250 construction workers will be needed during the construction phase of the Pretty Prairie Wind Energy Center. Local businesses, including those who participate in providing

construction materials, housing, food, recreation, and day to day necessities, are sure to benefit from this temporary increase in personnel.

Description

The portion of the wind energy center located in the zoned area of Reno County includes: 53 turbine sites using GE 2.5/2.8 MW or GE 2.3MW wind turbines. The GE 2.5/2.8MW machine has a hub height of 89 meters (291.99 feet) with 127 meter (416.67 feet) rotor diameter. The GE 2.3MW machine has a hub height of 80 meters (262.47') with 116 meter (380.58') rotor diameter. The total turbine height from ground to tip of blade is 499 feet for the GE 2.5/2.8MW machine and 453 feet for the GE 2.3MW machine. The collection substation is anticipated to be on an approximately 5 acre site. The collection substation, O&M facility and laydown yard are located in the unzoned area of Reno County. See Description of Facilities in Section III for more information regarding these uses.

Legal Description of Property

See Parcel Exhibit Map & Parcel List and Parcel Identification Number List in **Appendix A**

Construction Schedule

NextEra Energy Resources' experience in the development and construction management of over 100 wind farms throughout North America has resulted in some of the best-in-class project management in the industry. Assuming all permits are issued, the below table depicts an anticipated schedule outlining major Pretty Prairie Wind Energy Center milestones.

PRETTY PRAIRIE WIND ENERGY CENTER Milestones	
Break Ground	Spring, 2019
Turbine Delivery Commencement	Summer, 2019
Commercial Operation Date	Winter, 2019

3) PROCEDURE

Pretty Prairie Wind acknowledges and understands the requirements of Article 1-104 § 7 M, Article 2-109, Article 8-103, Article 15 §§ 101, 102, 105 and 106 and Article 20 of the Reno County Zoning Ordinance when reviewing the Conditional Use Permit process.

Because of particular conditions associated with the Conditional Use, certain uses might have an adverse effect upon nearby properties or upon the character and future development of a district and are not permitted outright in districts, but are permitted as Conditional Uses when their proposed location is supplemented by additional requirements so as to make the use requested compatible with the surrounding property, the neighborhood and the zoning jurisdiction.

The Planning Commission may recommend approval of a Conditional Use, and the Governing Body may approve such Conditional Use. The Application conforms and evidences compliance with all

applicable requirements and guidelines contained in Articles 8, 15 and 20 of the Reno County Zoning Ordinance.

4) DEVELOPMENT PLAN

The Pretty Prairie Wind Energy Center Development Plan ("Development Plan") is in conformance with the Reno County Application Requirements and can be found in **Appendix B**. To address the requirements of 8-103 of the Reno County Zoning Ordinances, the Development Plan includes maps showing the physical features and land uses of the Pretty Prairie Wind Energy Center, both before and after construction of the proposed project. Additionally, Pretty Prairie Wind provides the following information as specified in Section 8-103:

- *Existing contours:* The Development Plan utilizes USGS 7.5' series contours.
- *Proposed contours:* The Development Plan identifies proposed contours for the O&M facility. Turbine sites do not impact the topography or contours of the surrounding land.
- *Location and orientation of all existing and proposed buildings:* The Development Plan provides locations for existing residences and proposed turbine, O&M, and laydown yard locations.
- *Areas to be used for parking:* Parking areas will be located at the laydown area and the O&M facility.
- *Areas to be developed for screening:* No screening is proposed.
- *Structures and features:* Turbine locations and access roads are identified on the Development Plan.
- *Pedestrian and vehicular circulation:* A haul route will be provided and agreed upon by the County and Pretty Prairie Wind prior to construction.
- *Points of ingress and egress:* Access roads are identified on the Development Plan.
- *Location of all existing and proposed utilities:* Existing and proposed facilities relating to the O&M facility are identified on the Development Plan. Any utility crossings that may be required will be approved by the appropriate bodies prior to construction.
- *Drainage controls:* All drainage controls will be set forth in a SWPP that shall be finalized prior to construction. A copy of the SWPP can be made available to the County upon request.
- *Location, size and characteristics of identification and business signs:* No outdoor advertising or signage will be located in the zoned areas, except for identification and notification information for each turbine;
- *Lighting layout, appurtenances, and intensity of illumination:* All turbine lighting will be in accordance with FAA requirements. No other lighting will be associated with the structures proposed in the zoned areas of Reno County.
- *Proposed finished floor elevations of all buildings and structures:* Elevations for all turbines can be provided to the County upon request.

Pursuant to the requirement of 8-103(3), Pretty Prairie Wind proposes to implement the measures to achieve compatibility with surrounding properties through the planning of the site and location and design of structures, including but not limited to:

- All proposed turbines will be located a minimum of 2,000 feet from any non-participating residence;

- The proposed turbines shall be painted a non-reflective/off-white color designed to minimize visual impacts; and
- No advertising or graphics will be placed on any part of the tower or blades.

5) INSURANCE

Proof of public liability insurance can be found in **Appendix C**.

6) CONSENT DOCUMENTS

Listing of Landowners who have signed Consent Agreements including Parcel Identification Numbers can be found in **Appendix A**.

7) CERTIFICATIONS

Pretty Prairie Wind will comply with all applicable federal, state, and local laws and regulations and will obtain all required federal, state, and local approvals, licenses, permits or variances that are required for the proposed wind project. *NextEra Energy Resources* performs a systematic evaluation of its wind projects to ensure they are sited in an environmentally responsible manner and in compliance with all applicable local, state and federal laws and regulations.

The following list represents construction-related permits and approvals being pursued as part of this project:

ENTITY / APPLICATION	DESCRIPTION
Federal Aviation Administration (FAA)	Approval / Permit
Kansas Department of Agriculture Department of Water Resources	Various Permit
Reno County Roads	ROW Permits & Agreements
Townships (Haven Twp, Ninnescah Twp and Sumner Twp)	ROW Permits & Agreements
Kansas Department of Transportation (KDOT)	ROW Permits & Agreements
Utility, Pipeline and Right of Way Crossing Agreements	Underground & Overhead Permits & Agreements
Reno County Health Dept.	Well and Septic Permits
U.S. Army Corp of Engineers	Permit(s)
Reno County	Floodplain Development Permit
Kansas Dept. of Health and the Environment	General Construction Stormwater Permit
Kansas State Historic Preservation Office	Consultation/Permits as Necessary for Historic Properties
U.S. Department of Commerce, Interdepartmental Radio Advisory Committee	Consultation for Communication Systems

8) WILDLIFE AND VEGETATION INFORMATION

a. Environmental Setting

The Project Area is in the Prairie Tableland Ecoregion (Level IV Environmental Protection Agency Ecoregions) within the Central Great Plains. This ecoregion is characterized by flat, alluvial lowlands with perennial streams and springs and ranges in elevation from 1,100 to 1,800 feet. The geology of the area consists of loess and silty, sandy, and clayey alluvium as well as Permian sandstone, shale, and salt deposits (Wellington Formation). Average daily temperatures range from 22 to 96 degrees Fahrenheit. This ecoregion historically supported tallgrass prairie and now has been extensively converted to croplands. The native vegetation for this ecoregion includes tallgrass prairie species such as big bluestem (*Andropogon gerardii*), little bluestem (*Schizachyrium scoparium*), and Indiangrass (*Sorghastrum nutans*), with switchgrass (*Panicum virgatum*) in more mesic sites. Species typical of well-developed floodplain riparian forests include plains cottonwood (*Populus deltoides*), willow (*Salix* sp.), hackberry (*Celtis* sp.), black walnut (*Juglans nigra*), and bur oak (*Quercus macrocarpa*).

According to the National Land Cover Database for Kansas, land use and land cover for the Project are as follows (Table 1):

Table 1. Land Use and Land Cover Present in the Project Area, Reno County, Kansas

Land Use/Land Cover Description	Acres in Project Area	Percent of Project
Cultivated crops	28,704.68	62.83
Grassland/herbaceous	13,625.43	29.83
Developed open space	1,522.73	3.33
Pasture/Hay	926.44	2.03
Deciduous Forest	510.45	1.12
Open Water	137.03	0.30
Developed, Low Intensity	134.07	0.29
Woody wetlands	89.21	0.20
Developed, medium intensity	30.11	0.07
Emergent herbaceous wetlands	2.89	0.01
Developed, High Intensity	1.33	0.00
Total	45,684.37	100.00

b. Native Prairie

An assessment of native prairie was conducted within the Project Area, which included a desktop assessment of land cover followed by field verification to identify areas of native prairie. No native prairie was identified within the Project Area during the field verification; however, two other

grassland land cover types are present within the Project Area: grassland/herbaceous and pasture/hay.

Most of the grassland/herbaceous habitat verified within the Project Area was in an almost continuous stretch between the proposed turbine array and Cheney Reservoir. Although land parcels delineated as grassland/herbaceous within the Project Area contained healthy and abundant tallgrass prairie species such as Indiangrass (*Sorghastrum nutans*) and big bluestem (*Andropogon gerardii*), these species were found in monocultures on previously tilled or altered land (e.g., land leveling, terracing, and grade control) and thus did not meet the definition of native prairie. Evidence of frequent baling was found in many of these parcels. Turbines were microsituated to avoid areas of grassland land cover, regardless of quality, wherever feasible.

c. Threatened and Endangered Species Assessment

Plants

There are no state or federally listed plants with the potential to occur within the Project Area. The U.S. Fish and Wildlife Service (USFWS) lists two endangered or threatened plant species within the State of Kansas: Mead's milkweed (*Asclepias meadii*) and western prairie fringed orchid (*Platanthera praeclara*); however, they have not been documented in Reno County.

Wildlife

The federally and state-listed wildlife species that may be found in the Project Area were evaluated for likelihood of occurrence (Table 2). The USFWS lists 15 endangered or threatened wildlife species within the State of Kansas, five of which they list as known or expected to occur within Reno County (whooping crane, least tern, red knot [*Calidris canutus rufa*], Arkansas river shiner, and northern long-eared bat [*Myotis septentrionalis*]; Table 2). The KDWP lists 51 state-listed endangered or threatened species in Kansas, nine of which they list as expected or known to occur in Reno County (Table 2).

Table 2. Federally and State-Listed Wildlife Species Known or Expected to Occur in Reno County and their Potential to Occur in the Project Area

Common Name	Scientific Name	Federal/State Status ¹	Species-Habitat Associations	Likelihood of Occurrence ²
Birds				
Least tern	<i>Sternula antillarum</i>	FE/SE	Rare summer resident in Kansas that requires barren areas near water such as saline flats in salt marshes, sand bars in river beds, and shores of large impoundments. May occur at Cheney Reservoir, approximately 2.5 miles west of the Project.	Low
Piping plover	<i>Charadrius melodus</i>	FT/ST	Rare migrant that requires sparsely vegetated shallow wetlands and open beaches and sandbars adjacent to or within streams and impoundments. May occur at Cheney Reservoir, approximately 2.5 miles west of the Project.	Low
Snowy plover	<i>Charadrius nivosus nivosus</i>	ST	Lives on open salt flats, beaches and bars of rivers, and wetlands. May occur at Cheney Reservoir, approximately 2.5 miles west of the Project.	Low
Whooping crane	<i>Grus americana</i>	FE/SE	Migrant that prefers croplands interspersed with palustrine wetlands. Project is within the migration corridor.	High – migration Moderate - stopover
Fishes				
Arkansas darter	<i>Etheostoma cragini</i>	FC/ST	Lives in shallow, clear, spring-fed tributary and headwater streams having sand or sandy-gravel substrates. There is KDWPT-designated critical habitat within the Project Area.	High
Arkansas River shiner	<i>Notropis girardi</i>	FT/SE	Lives in main channels of wide, sand-bottomed rivers and larger streams of the Arkansas River basin. There is KDWPT-designated critical habitat in the far northeast corner of the Project Area in the Arkansas River.	Moderate
Peppered chub	<i>Macrhybopsis tetranema</i>	SE	Lives in shallow channels of permanently flowing streams where currents flow over clean fine sand. There is KDWPT critical habitat in neighboring Sedgwick County.	Low
Plains minnow	<i>Hybognathus placitus</i>	ST	Found in the Republican, Smoky Hill, Cimarron, and Arkansas Rivers. Needs sufficient water flow and flow rates with high and low extremes in order to complete its life cycle. There is KDWPT-designated critical habitat within the North Fork Ninnescah River to the west of the Project Area.	Low
Silver chub	<i>Macrhybopsis storeriana</i>	SE	Lives in large sandy rivers on or near the bottom. Found in deep water during summer months. There is KDWPT critical habitat adjacent to the Project in neighboring Sedgwick	Low

Common Name	Scientific Name	Federal/State Status ¹	Species-Habitat Associations	Likelihood of Occurrence ²
			County.	
Mammals				
Eastern spotted skunk	<i>Spilogale putorius</i>	ST	Prefers forest edges and upland prairie grasslands, where rock outcrops and shrub clumps are present. There is one known occurrence in Reno County. KDWPT-critical habitat is in Sedgwick County, adjacent to but outside of the Project.	Moderate
Northern long-eared bat	<i>Myotis septentrionalis</i>	FT	Found in conifer forests, deciduous forests, and mixed forests. Roosts in cavities, caves, mines, underneath tree bark or in crevices of trees and snags, bridges/culverts; rarely roosting in barns. Hibernates in caves and mines. Known hibernaculum in Kansas. The Project is within the species' range. There are no known occurrences in Reno County and the population is concentrated in north central and northeastern Kansas.	Low
¹ FE= Federal Endangered, FT= Federal Threatened, SE=State Endangered, ST = State Threatened ² Potential for Occurrence Onsite: Unlikely– no species range overlap with Project Area or unsuitable habitat in Project vicinity; Low– species range overlaps with Project Area and marginally suitable habitat in Project vicinity; Moderate– species range overlaps with Project Area and suitable habitat present in Project Area, or species known to occur in habitat similar to Project Area; High–highly suitable habitat present in Project Area, or known populations exist in Project vicinity. Sources: USFWS 2018b, 2018c; KDWPT 2018b, 2018d				

There are four species with a moderate or high likelihood of occurrence based on the presence or proximity of potentially suitable habitat within or adjacent to the Project. To address potential risks to the whooping crane, appropriate sections of the Project transmission line will be marked with bird flight diverters. To avoid potential impacts to the Arkansas darter and Arkansas River shiner, the Project plans to avoid impacting potential habitat (i.e., rivers and streams) of these species. The project plans to avoid impacts to the eastern spotted skunk. Should avoidance not be feasible, then appropriate permits will be obtained from the Kansas Department of Wildlife, Parks and Tourism (KDWPT).

d. Avian

Avian and Eagle Use Surveys

Eagle use and avian use surveys for the Project were conducted in Spring 2018, Summer 2018, Fall 2018, and Winter 2018/2019 based on recommendations in the USFWS Land-based Wind Energy Guidelines and the USFWS Eagle Conservation Plan Guidance (ECP Guidance). Bi-weekly eagle use and avian use surveys were performed at the Project for one year at 19 point-count locations (spring, summer, fall) and 22 point-count locations (winter) distributed throughout the Project Area. Avian use surveys were 20 minutes each and eagle use surveys were 60 minutes each; both avian and eagle use surveys were conducted from the same 800-meter radius observation points.

Spring 2018 Survey

A total of 3,926 individuals were detected during general avian use surveys at the Project. Overall mean use for the Project Area was 29.52 birds/20 minutes. The number of birds detected per avian use survey ranged from 0 to 367 birds/20 minutes. The songbird species with the highest mean use are year-round residents of developed areas and agriculture (red-winged blackbird and eastern meadowlark) and a summer breeder (dickcissel). The raptor species with the highest mean use was turkey vulture when compared to other raptors observed during spring; however, both mean use and encounter rate were low.

No bald eagles or golden eagles were observed during the 133 hours of eagle use surveys in spring.

Summer 2018 Survey

A total of 2,541 individuals were detected during summer avian use surveys. Overall mean use for the Project Area was 26.75 birds/20 minutes. The number of birds detected per avian use survey ranged from 0 to 252 birds/20 minutes. The non-raptor species with the highest mean use are year-round residents of developed and agriculture areas common throughout the Project Area (brown-headed cowbird, red-winged blackbird, and mourning dove) and a summer breeder (barn swallow). The raptor species with the highest mean use and encounter rate was turkey vulture, followed by red-tailed hawk; however, mean use and encounter rates for both species, when compared to all birds observed, were low.

No bald eagles or golden eagles were observed during the 95 hours of eagle use surveys in summer.

Fall 2018 Survey

A total of 4,803 individuals were detected during fall avian use surveys. Overall mean use for the Project Area was 42.13 birds/20 minutes. The number of birds detected per avian use survey ranged from 0 to 1,144 birds/20 minutes. The songbird species with the highest encounter rate at the Project was brown-headed cowbird. The songbird species with the highest mean use are year-round residents of developed and agriculture areas common throughout the Project Area (brown-headed cowbird, red-winged blackbird, and European starling). European starlings are a non-native species and therefore not protected by any federal or state regulations, including the Migratory Bird Treaty Act. Franklin's gull and greater white-fronted goose both had relatively high mean uses and encounter rates. Similar to summer results, the raptor species with the highest mean use and encounter rate was turkey vulture, followed by red-tailed hawk; however, mean use and encounter rates for both species, when compared to all birds observed, were low.

No bald eagles or golden eagles were observed during the 114 hours of eagle use surveys in fall.

Winter 2018/2019 Survey

Winter avian and eagle use surveys are currently in progress. The expected completion date for the field work is the end of February 2019.

Results of the avian and eagle use surveys at the Pretty Prairie Wind Energy Project suggest that although there is potential for impacts on birds (e.g., songbirds, turkey vulture, red-tailed hawk) due to Project development, potential impacts are not anticipated to have population-level impacts. There were no eagle observations in spring, summer, and fall surveys and winter surveys are currently ongoing.

Aerial Raptor Nest Surveys

In Spring 2018, aerial surveys were conducted to inventory all raptor nests within the Project plus a 2-mile buffer, and all eagle nests within a 10-mile buffer around the Project. A helicopter was used to fly north-to-south transects spaced 1-mile apart over the Project Area and within a 2-mile buffer from the Project boundary, and of the proposed transmission line. Within the remainder of the 10-mile radius around the Project Area, the survey crew searched only suitable bald eagle nesting habitat (golden eagles are not known to breed in eastern Kansas). The aerial survey was conducted on March 13-14, 2018, before leaves emerged on trees. Following the aerial survey, Tetra Tech conducted a ground-based survey from April 29-30, 2018 within the Project Area and the 2-mile buffer. The ground-based survey was designed to check on the status of eagle and raptor nests detected during the aerial nest survey, and to search for any late nesting raptors. The ground-based survey was conducted from accessible public roadways by a biologist equipped with binoculars and a spotting scope to better identify distant nests.

A total of 42 raptor nests were detected during the surveys, 29 during the aerial survey, and 13 additional nests during the ground-based survey. The detected nests included seven bald eagle nests (three alternate and four in-use), eight red-tailed hawk nests (all in-use), two great horned owl nests (all in-use), one Swainson's hawk nest (in-use), one unknown (*buteo* species) nest (in-use), and 23 small inactive nests with unknown species determination. No bald eagle nests were found within the Project Area during surveys. All bald eagle nests observed were two miles or more from the current Project boundary (boundary dated January 16, 2019). Five of the seven bald eagle nests were near Cheney Reservoir.

e. Bats

Bat monitoring occurred in the Project Area in 2018. Four ground-based stations and microphones were located in areas which generally represented common habitat types found within the Project Area and in locations that may provide roosting and foraging opportunities for bats. The detectors recorded bat activity for the spring through fall survey period, with the highest activity rates detected during May, July, and early October. Tetra Tech used Wildlife Acoustics Song Meter SM3BAT Monitoring Systems to record bat activity in full spectrum format for the duration of the acoustic monitoring survey.

During the 2018 surveys, 894 detector-nights (cumulative number of nights surveyed by all microphones) were sampled over the course of 232 calendar nights. A total of 23,352 bat passes were recorded and identified to the species level or frequency group, resulting in an overall activity rate of 26.1 bat passes/detector-night.

Bat passes identified at the species level included eight species. The eastern red bat was the most commonly recorded species (40 percent of the total passes recorded), followed by evening bats (24 percent), unidentified high frequency bat species (15 percent), cave myotis (7 percent), unidentified low frequency bat species (5 percent), silver-haired bats (2 percent), Brazilian free-tailed bats (2 percent), big brown bats (2 percent), and hoary and tri-colored bats (1 percent each).

No federally or state-listed threatened or endangered bats were detected during the survey. No passes were positively identified as northern long-eared bats. The 2018 acoustic survey results indicate that the Project Area is used by non-migratory bats, as well as long distance and regional migrants in the spring, summer, and fall.

f. Permitting

No wildlife-related permits are anticipated to be required for the Project, since the Project plans to avoid impacts that would result in the need for permits for listed species. Should avoidance not be feasible, then appropriate permits will be obtained from the Project.

9) Water Resources

a. Surface Water and Floodplains

Two surface water feature types are located within the overall Project Area boundary: intermittent streams and perennial flows. An intermittent stream feature has seasonal water flow. Perennial streams have continuous water flow in parts year-around. There are approximately 194 miles of intermittent streams within the overall Project boundary and 11 miles of perennial streams. Most of the intermittent streams overlap with the NWI freshwater emergent and riverine wetlands.

One river and four named creeks run through the Project Area: Arkansas River, Gar Creek, Big Slough, Rock Creek, and Spring Creek. FEMA data indicates 100-year flood zones (Zone A) around the larger creeks across the site and in the northeast corner near Gar Creek and the Arkansas River. Turbines will not be located in the 100-year flood zones.

b. Wetlands

Most wetlands are associated with the small natural drainages across the Project Area. More than 100 potential small ponds and lakes are scattered across the Project Area. Within the 45,684 acres of the Project Area, the National Wetlands Inventory (NWI) shows approximately 630 acres as wetlands. (See table below)

Table 3. NWI Wetlands Located within the Project Area

Cowardin Classification	Total Acreage	Wetland Count
Freshwater Emergent Wetlands	181.2	245
Freshwater Forested/Scrub Shrub Wetlands	30.7	35
Freshwater Pond/Lake	95.1	103
Riverine Wetlands	322.7	258

The topography of the landscape within the overall Project Area indicates that there are likely many small palustrine wetlands situated in and around intermittent and perennial drainage features. Many of these areas are associated with agricultural lands.

Surface waters, wetlands and surrounding riparian areas generally provide good habitat for land and aquatic species. A field verification of vegetation, hydrology, and soils will be performed to determine the jurisdictional status of these probable wetlands and other waters. Project turbines will be carefully sited to avoid streams, wetlands and floodplains.

c. Permitting

As stated above, the project will be designed and developed to avoid the need for major permits. Table 4 lists potential permits that may be needed that are related to water resources.

Table 4. Potential Permits Related to Water Resources

Level	Permit	Authorizing Agency	Triggers / Thresholds	Status
Federal	Section 404 Permit	U.S. Army Corps of Engineers (USACE)	Discharges of dredged or fill material into waters of the United States (WOUS), including their adjacent wetlands; construction, excavation, or filling activities encroaching upon floodplains.	Efforts will be made to avoid or minimize permanent impacts to WOUS. Project will likely utilize USACE Nationwide Permit (NWP) # 12 for any impacts to WOUS. Authorization under NWP # 12 will be confirmed prior to associated construction activities.
State	Stream Obstruction Permit and Floodplain Fill Permit	Kansas Department of Water Resources (KDWR)	Channel modifications of state designated streams and floodplain fill activities	Efforts will be made to avoid impacts to state designated streams and regulated floodplains. If needed, appropriate permits will be obtained prior to associated construction activities.
State	NPDES/Kansas General Permit for Stormwater Runoff Associated with Construction Activities	Kansas Department of Health and Environment (KDHE), Bureau of Water, Industrial Programs Section	Disturbance of 1 or more acres of land.	Authorization will be obtained from the KDHE prior to construction.
Local	Floodplain Development Permit and associated Engineering No-Rise Certification	Reno County	For any proposed development in a 100-year flood zone.	Efforts will be made to avoid impacts to regulated floodplains. If needed, appropriate permits will be obtained prior to associated construction activities.
Local	Wastewater or Water Well System Application	Reno County Public Works-Planning and Zoning Division	Development of a septic system or installation of groundwater well	Appropriate permits or approvals will be obtained prior to the construction.

10) COMPLAINT RESOLUTION

A copy of the Complaint Resolution Summary & Form can be found in **Appendix D**.

11) FIRE SUPPRESSION PLAN

Pretty Prairie Wind will work with local fire emergency responders to ensure all fire safety compliance procedures are in place and enforced during construction and operations of the proposed wind energy center. Procedures will include, but will not be limited to:

- Preventative Maintenance
- Equipment Monitoring
- Effective Communication
- Training

Pretty Prairie Wind will utilize a preventative maintenance program, ensuring potential fire hazards are addressed before they occur. This program will include regularly scheduled inspections, and routine maintenance of all turbines, transformers, and equipment.

In addition to regular turbine inspections, the equipment will be monitored utilizing two separate facilities that provide continuous turbine observation. The local Operation and Maintenance ("O&M") building, located in the unzoned area of Reno County, and NextEra Energy Resources' Performance Diagnostic Center (PDC) in Juno Beach, Florida, are equipped to provide continuous, real time monitoring of the wind energy center turbines and systems. The two facilities enable the Pretty Prairie Wind operations staff to react immediately to any fire or threat of fire.

Finally, Pretty Prairie Wind will create a communication action plan to effectively streamline communication with emergency responders. The plan will be shared with the fire department, township, and site personnel. The plan will include a contact list, site schedules, and will outline potential risks. A wind energy center map indicating specific turbine locations will be provided to the local fire department. All turbines will be uniquely numbered for identification and effective locating purposes. The O&M building and substation will be equipped with appropriate signage indicating potential hazards and emergency contact information. MSDS detailing all combustible materials within the turbine, will also be made available to fire and safety personnel.

12) STANDARDS AND REQUIREMENTS

As illustrated in the Development Plan (**Appendix B**), Pretty Prairie Wind shall comply with, or exceed, the following additional standards and requirements:

- a) Setbacks from Non-Participating and Participating Property Lines, in compliance with Article 15, Section 105(14)(A)(1) of the Reno County Zoning Regulations;
- b) Setbacks from Public Roads, in compliance with Article 15, Section 105(14)(A)(1) of the Reno County Zoning Regulations;
- c) Setbacks from Agricultural and Residential Accessory Structures, in compliance with Article 15, Section 105(14)(A)(2) of the Reno County Zoning Regulations;
- d) Setbacks from Non-Participating and Participating Residential Structures, in compliance with Article 15, Section 105(14)(A)(3) of the Reno County Zoning Regulations;
- e) Setbacks from St. Joe OST, Cheney Lake and Haven;
- f) Setbacks from Access Roads; and
- g) Setbacks for SCADA or MET Towers

13) CONSTRUCTION CODES, TOWERS, AND INTERCONNECTION STANDARDS

Pretty Prairie Wind will comply with the following requirements regarding the Pretty Prairie Wind Energy Center prior to the commencement of proposed construction:

- All applicable state construction and electrical codes and local building, well, and septic permit requirements.
- Wind energy systems including towers shall comply with Federal Aviation Administration requirements, and local jurisdiction regulations.
- All lighting shall comply with Federal Aviation Administration requirements.
- Wind Energy Conversion Systems shall comply with applicable utility, Kansas Corporation Commission, and Federal Energy Regulatory Commission interconnection standards.

14) SAFETY

Pretty Prairie Wind will comply with all federal, state, and local safety codes and requirements. All wind energy systems will be designed to prevent unauthorized access to electrical and mechanical components and have access doors that are to be kept securely locked at all times when service personnel are not present. All spent lubricants and cooling fluids will be properly and safely removed in a timely manner from the site of the wind energy system. Signs will be posted near the towers and Operations and Maintenance Office building that will contain emergency contact information.

15) VISUAL SIMULATION

Pretty Prairie Wind proposes to use GE 2.5/2.8 MW with 127 meter rotor diameter, 89 meter towers, and GE 2.3 MW with 116 meter rotor diameter, 80 meter towers. All turbines are three bladed, upwind horizontal axis monopole steel tubular towers. These turbines employ active yaw control to steer the machine with respect to the wind, active blade pitch, and a generator/power electronic converter system. The towers and turbines will be painted with a non-reflective/off-white color designed to minimize visual impacts. No advertising or graphics will be placed on any part of the tower or blades, however, the turbines are clearly numbered above the entrance doors for identification and emergency response. The towers will not be illuminated except as required by the FAA.

Visual Simulation can be found in **Appendix E**.

16) DECOMMISSIONING

Pretty Prairie Wind will enter into a decommissioning agreement with the County specifying the terms for the decommissioning of the Pretty Prairie Wind Energy Center.

III. ADDITIONAL INFORMATION

1) DESCRIPTION OF FACILITIES

An individual contractual agreement, permitting the siting of a facility/turbine, has been signed by the respective landowner for each proposed wind turbine and related facilities location. In addition, Pretty Prairie Wind has written agreements with each consenting landowner, which ensures minimal impact to their land. Below, please find a listing of all proposed Pretty Prairie Wind Energy Center facilities. See the Development Plan in **Appendix B** for locations of proposed facilities.

- **Generation Equipment Description**

Pretty Prairie Wind proposes to use GE 2.5/2.8 MW and 2.3 MW three bladed, upwind horizontal axis wind turbines throughout the project. The GE 2.5/2.8 MW turbines utilize a 127 meter diameter rotor and rest on an 89 meter tubular steel monopole. The GE 2.3 MW turbines utilize a 116 meter diameter rotor and rest on an 80 meter tubular steel monopole. Both turbines employ active yaw control to steer the machine with respect to the wind, and have active blade pitching to maximize power output. Each turbine houses a generator/power electronic converter system. The towers and turbines will be painted with a non-reflective/off-white color designed to minimize visual impacts. No advertising or graphics will be placed on any part of the tower or blades, however, the turbines will be clearly numbered above the entrance doors for identification and emergency response. The towers will not be illuminated except as required by the FAA.

- **Electrical Collection System**

The power generated by the Pretty Prairie Wind Energy Center will be collected and conveyed below ground on private participating landowner property, or approved crossings, to a substation by an electrical power collection system. Due to logistical requirements, including potential landowner requests and geological and environmental constraints that become known during construction, the final location of such electrical collection systems will be provided to the County in as-built surveys following completion of construction.

- **Collection Substation**

The project collection substation, located in the unzoned area of Reno County, increases the voltage from the 34.5 kV, as collected from the pad-mounted transformers at each wind turbine, to the 138 kV required for interconnection. The project collection substation will contain a transformer, metering equipment, circuit breakers, poles and disconnects, and other devices to regulate the flow of electrical power.

- **Switchyard**

The project will interconnect at the existing Westar Gordon Evans 138 kV Substation located in Sedgwick County.

- **Overhead Transmission Line Connection**

An overhead 138kV transmission line will be constructed to transfer wind energy system power from the collection substation in Reno County to the Gordon Evans Substation in Sedgwick County.

- **Laydown Yard**

A gravel base laydown area, located on approximately 20 acres of land in the unzoned area of Reno County (see **Appendix B: Development Plan**), will be required during construction of the Pretty Prairie Wind Energy Center. This laydown yard will be used to temporarily store turbine parts, equipment, office trailers, and parking.

Operations & Maintenance Facility

Operations, storage, and repairs for the wind energy center project would be coordinated from the Operations and Maintenance (“O&M”) facility, proposed to be located in Section 33, Township 25, and Range 4 West. This facility contains offices, parking for maintenance trucks, and houses the control system for the wind turbines, spare parts, consumables, and tools.

- **Anemometer Tower**

The proposed Pretty Prairie Wind Energy Center will require two (2) meteorological towers (“Met Towers”), one located in Section 31, Township 25, and Range 4 West and the other located in Section 16, Township 25, Range 5 West. The Met Towers will be 89 meters in height and properly lighted according to recommendations from the FAA. The towers will be mounted with equipment used to monitor wind speed, wind direction, temperature, barometric pressure, data logging and data transfer equipment. The Met Towers will not generate electricity.

2) ACCESS ROADS

- **Existing Roads**

There is an existing roadway system sufficient for transportation to the project location and to the necessary roads providing access to each proposed wind turbine generator. It may be necessary to improve some existing roads (grade or widen) during construction to accommodate construction equipment and equipment transport trucks. A road use agreement specifying the terms of such use of County roads (the “Road Use Agreement”) may be approved by the Reno County Road Commission before construction commences.

In accordance to the Road Use Agreement, Pretty Prairie Wind will restore existing public roads after construction where improvements are necessary. It may also be necessary to repair, repave, or reconstruct existing county roads damaged by project construction. Pretty Prairie Wind will promptly repair any project-related damage to existing county roads after construction to standards specified by road managers, as agreed before construction begins.

- **New Turbine Access Roads**

Newly constructed turbine access roads will be rough graded, and will consist of approximately 4-6 inches of gravel over compacted material. The gravel will be obtained off site from local crushed rock gravel pits. The access roads will generally be constructed at-grade. Built material will be used only where needed to supplement the existing base or to

blend the road into the surroundings. Culverts may be installed if washes cannot be crossed at grade and as preventive measures to avoid any damages to the existing or new access roads and the existing highway/county road system. When construction is complete, the access roads will be left in place to provide access for future operations and maintenance activities. After construction, these roads will be graded where low spots and ruts have occurred and culverts will be left in place. The roads will also be available for the use of the landowner.

IV. CONCLUSION

This submission and its attachments demonstrate Pretty Prairie Wind's compliance with the Reno County's Comprehensive Plan, Zoning Ordinance and with the general and specific standards and requirements for Conditional Uses. More specifically, addressing the requirements of Section 20-104 of the Reno County Zoning Ordinances, Pretty Prairie Wind states as follows:

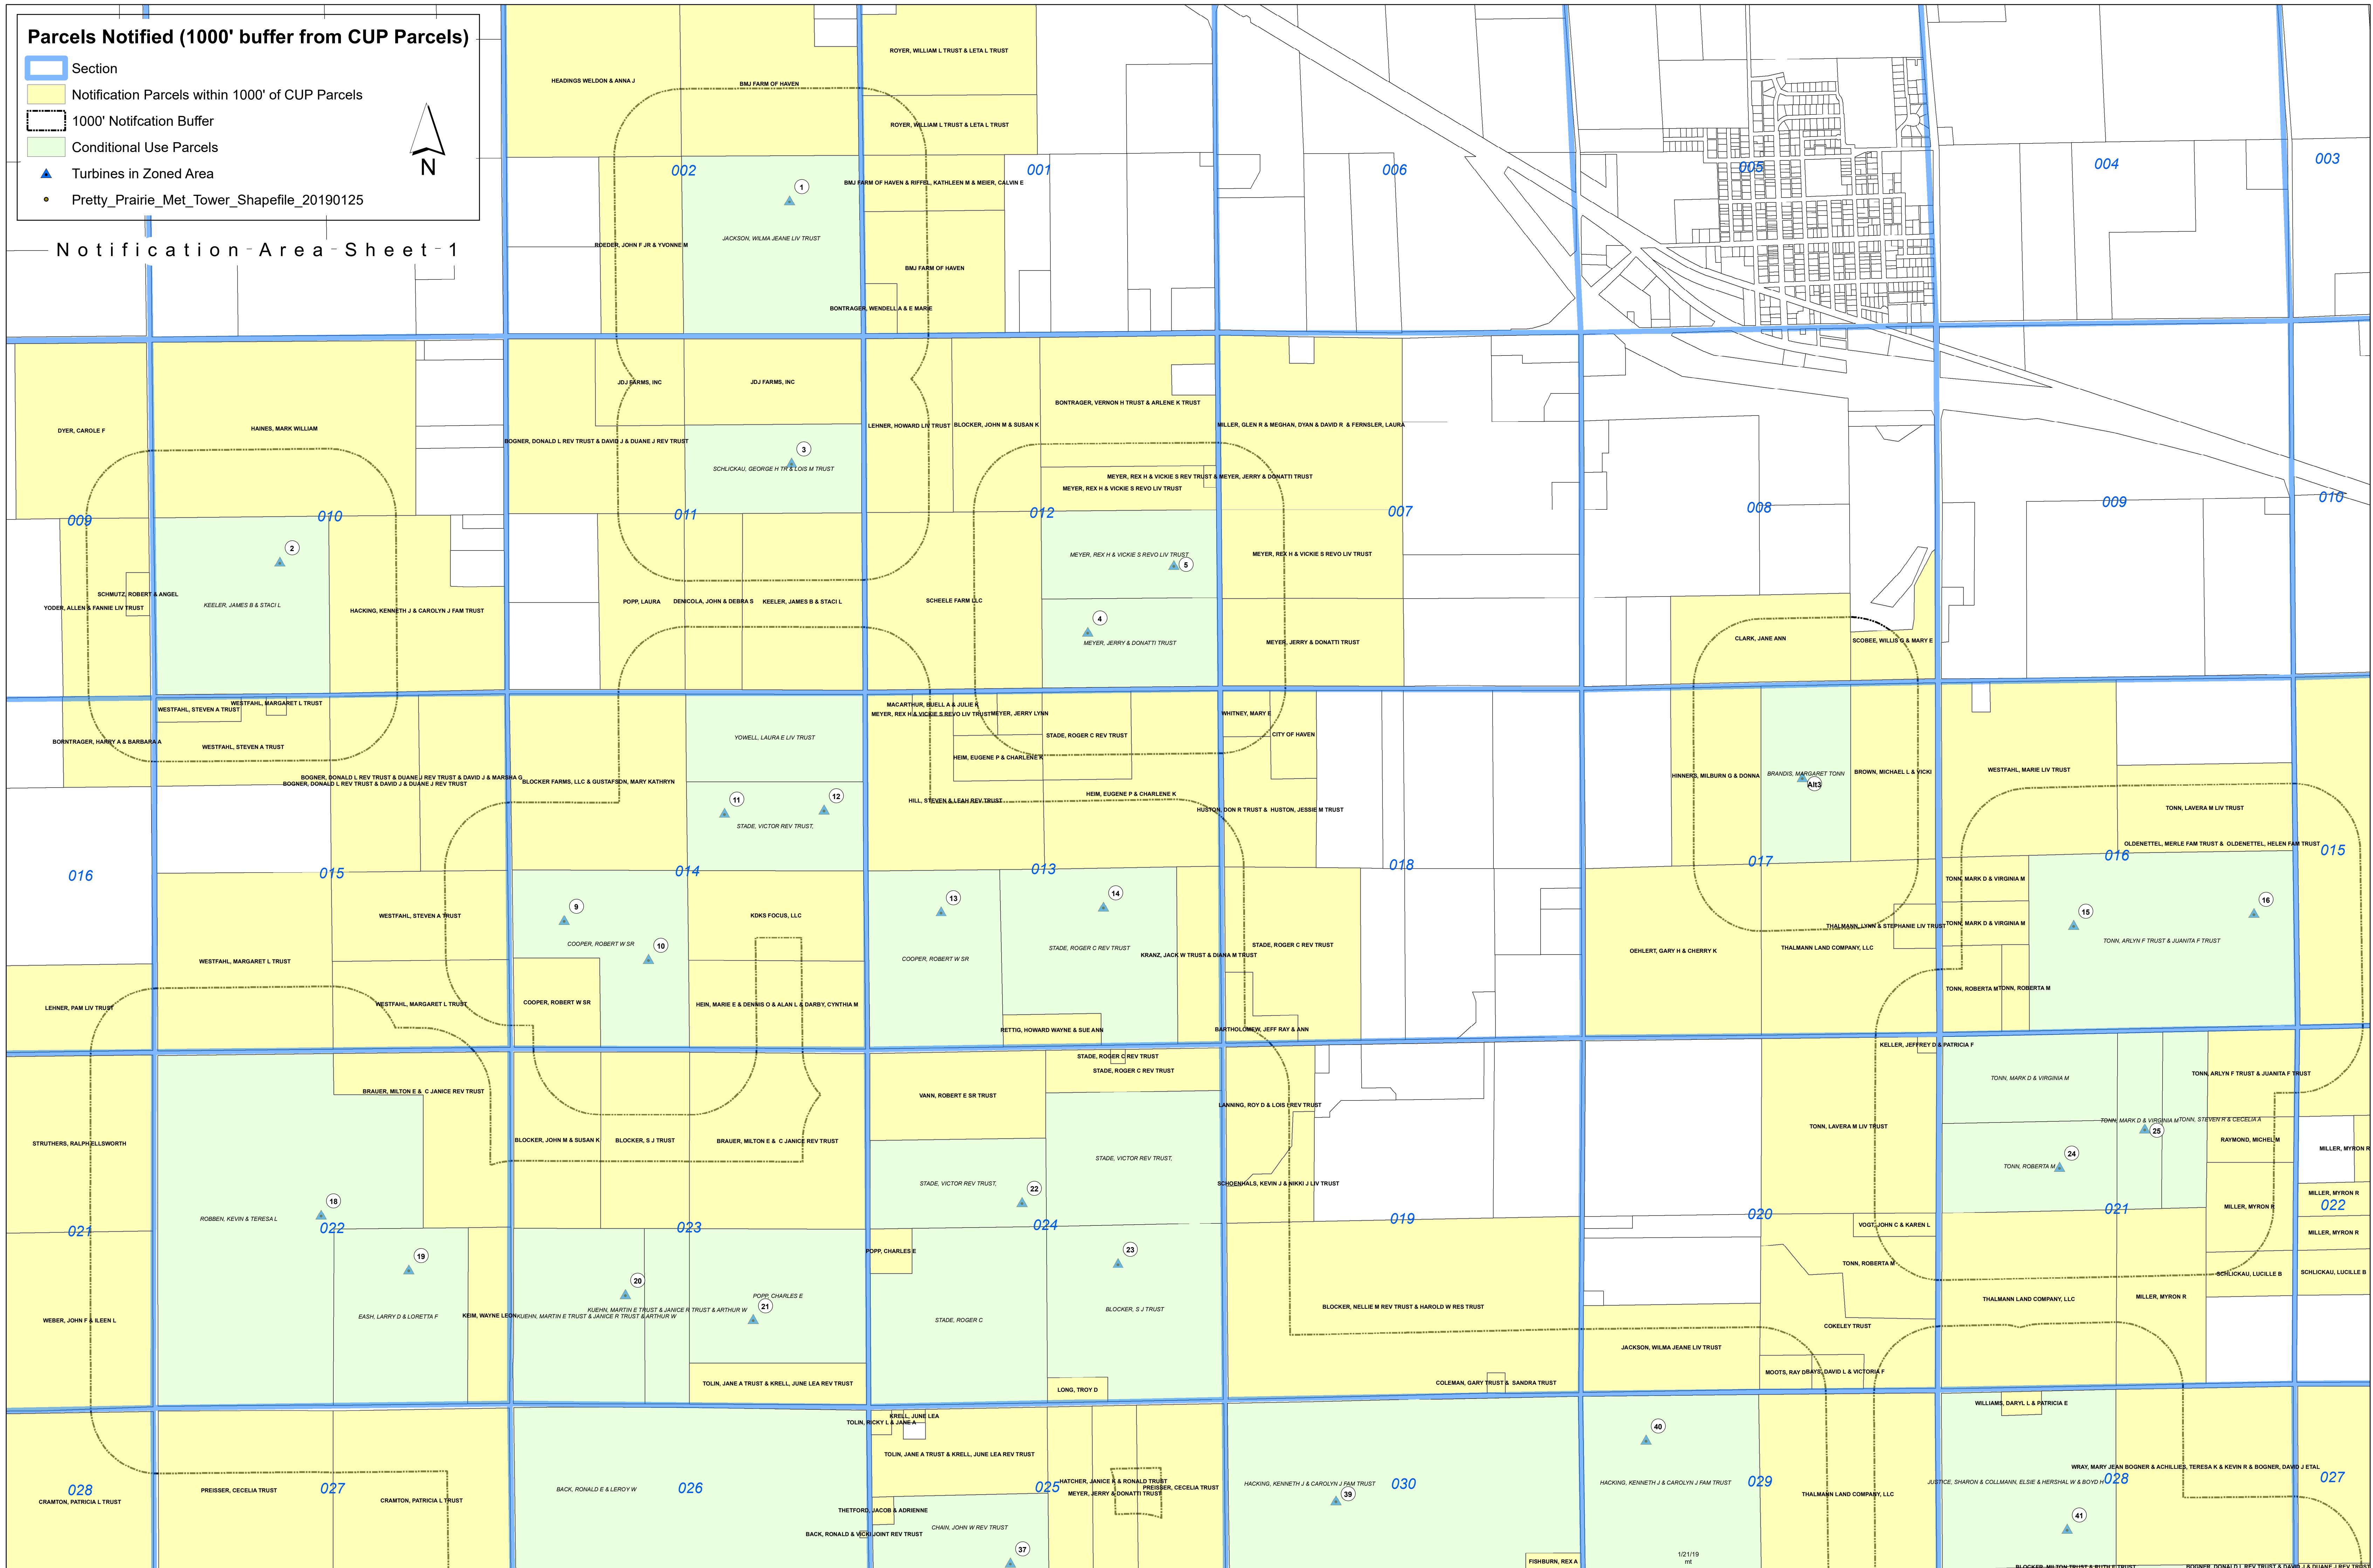

- A. *Whether the change in classification would be consistent with the intent and purpose of these Regulations:* This application does not contemplate a change in classification, and the Reno County Zoning Ordinances currently enumerates commercial wind energy conversion systems as a conditional use that may be permitted by the County. Therefore, Pretty Prairie Wind contends that the uses set forth in this application are consistent with the intent and purpose of the Reno County Zoning Ordinances.
- B. *The character and condition of the surrounding neighborhood and its effect on the proposed change:* The proposed area is predominantly used for agricultural purposes. Wind energy is compatible with agricultural uses. Numerous wind farms have been successfully sited and operated in areas similar to Reno County.
- C. *Whether the proposed amendment is made necessary because of changed or changing conditions in the area affected, and, if so, the nature of such changed or changing conditions:* No amendment is being proposed as part of this application. Also, studies have been performed that demonstrate that the wind resource available within the project area is appropriate for a wind energy conversion system given current technology.
- D. *The current zoning and uses of nearby properties, and the effect on existing nearby land uses upon such a change in classification:* No change in classification is being proposed as part of this application. As described above, wind energy is compatible with nearby agricultural zoning and agricultural uses.
- E. *Whether every use that would be permitted on the property as reclassified would be compatible with the uses permitted on other property in the immediate vicinity:* No change in classification is being proposed as part of this application. Also, given the layout and siting of the Project proposed by the applicant, the uses approved as part of this conditional use application are compatible with the uses in the immediate vicinity of the project area.
- F. *The suitability of the applicant's property for the uses to which it has been restricted:* The primary current use of the property is agricultural, and agricultural land is uniquely suited for wind energy conversion.
- G. *The length of time the subject property has remained vacant or undeveloped as zoned; provided, the use of land for agricultural purposes shall be considered as viable use of the land and not be considered as allowing the land to be vacant or undeveloped:* The property proposed to be included is primarily agricultural and not vacant or undeveloped.
- H. *Whether adequate sewer and water facilities, and all other needed public services including transportation, exist or can be provided to serve the uses that would be permitted on the property if it were reclassified:* Wind energy conversion does not require access to sewer and water facilities. Adequate transportation routes to serve the property exist or will be upgraded or provided by the applicant.

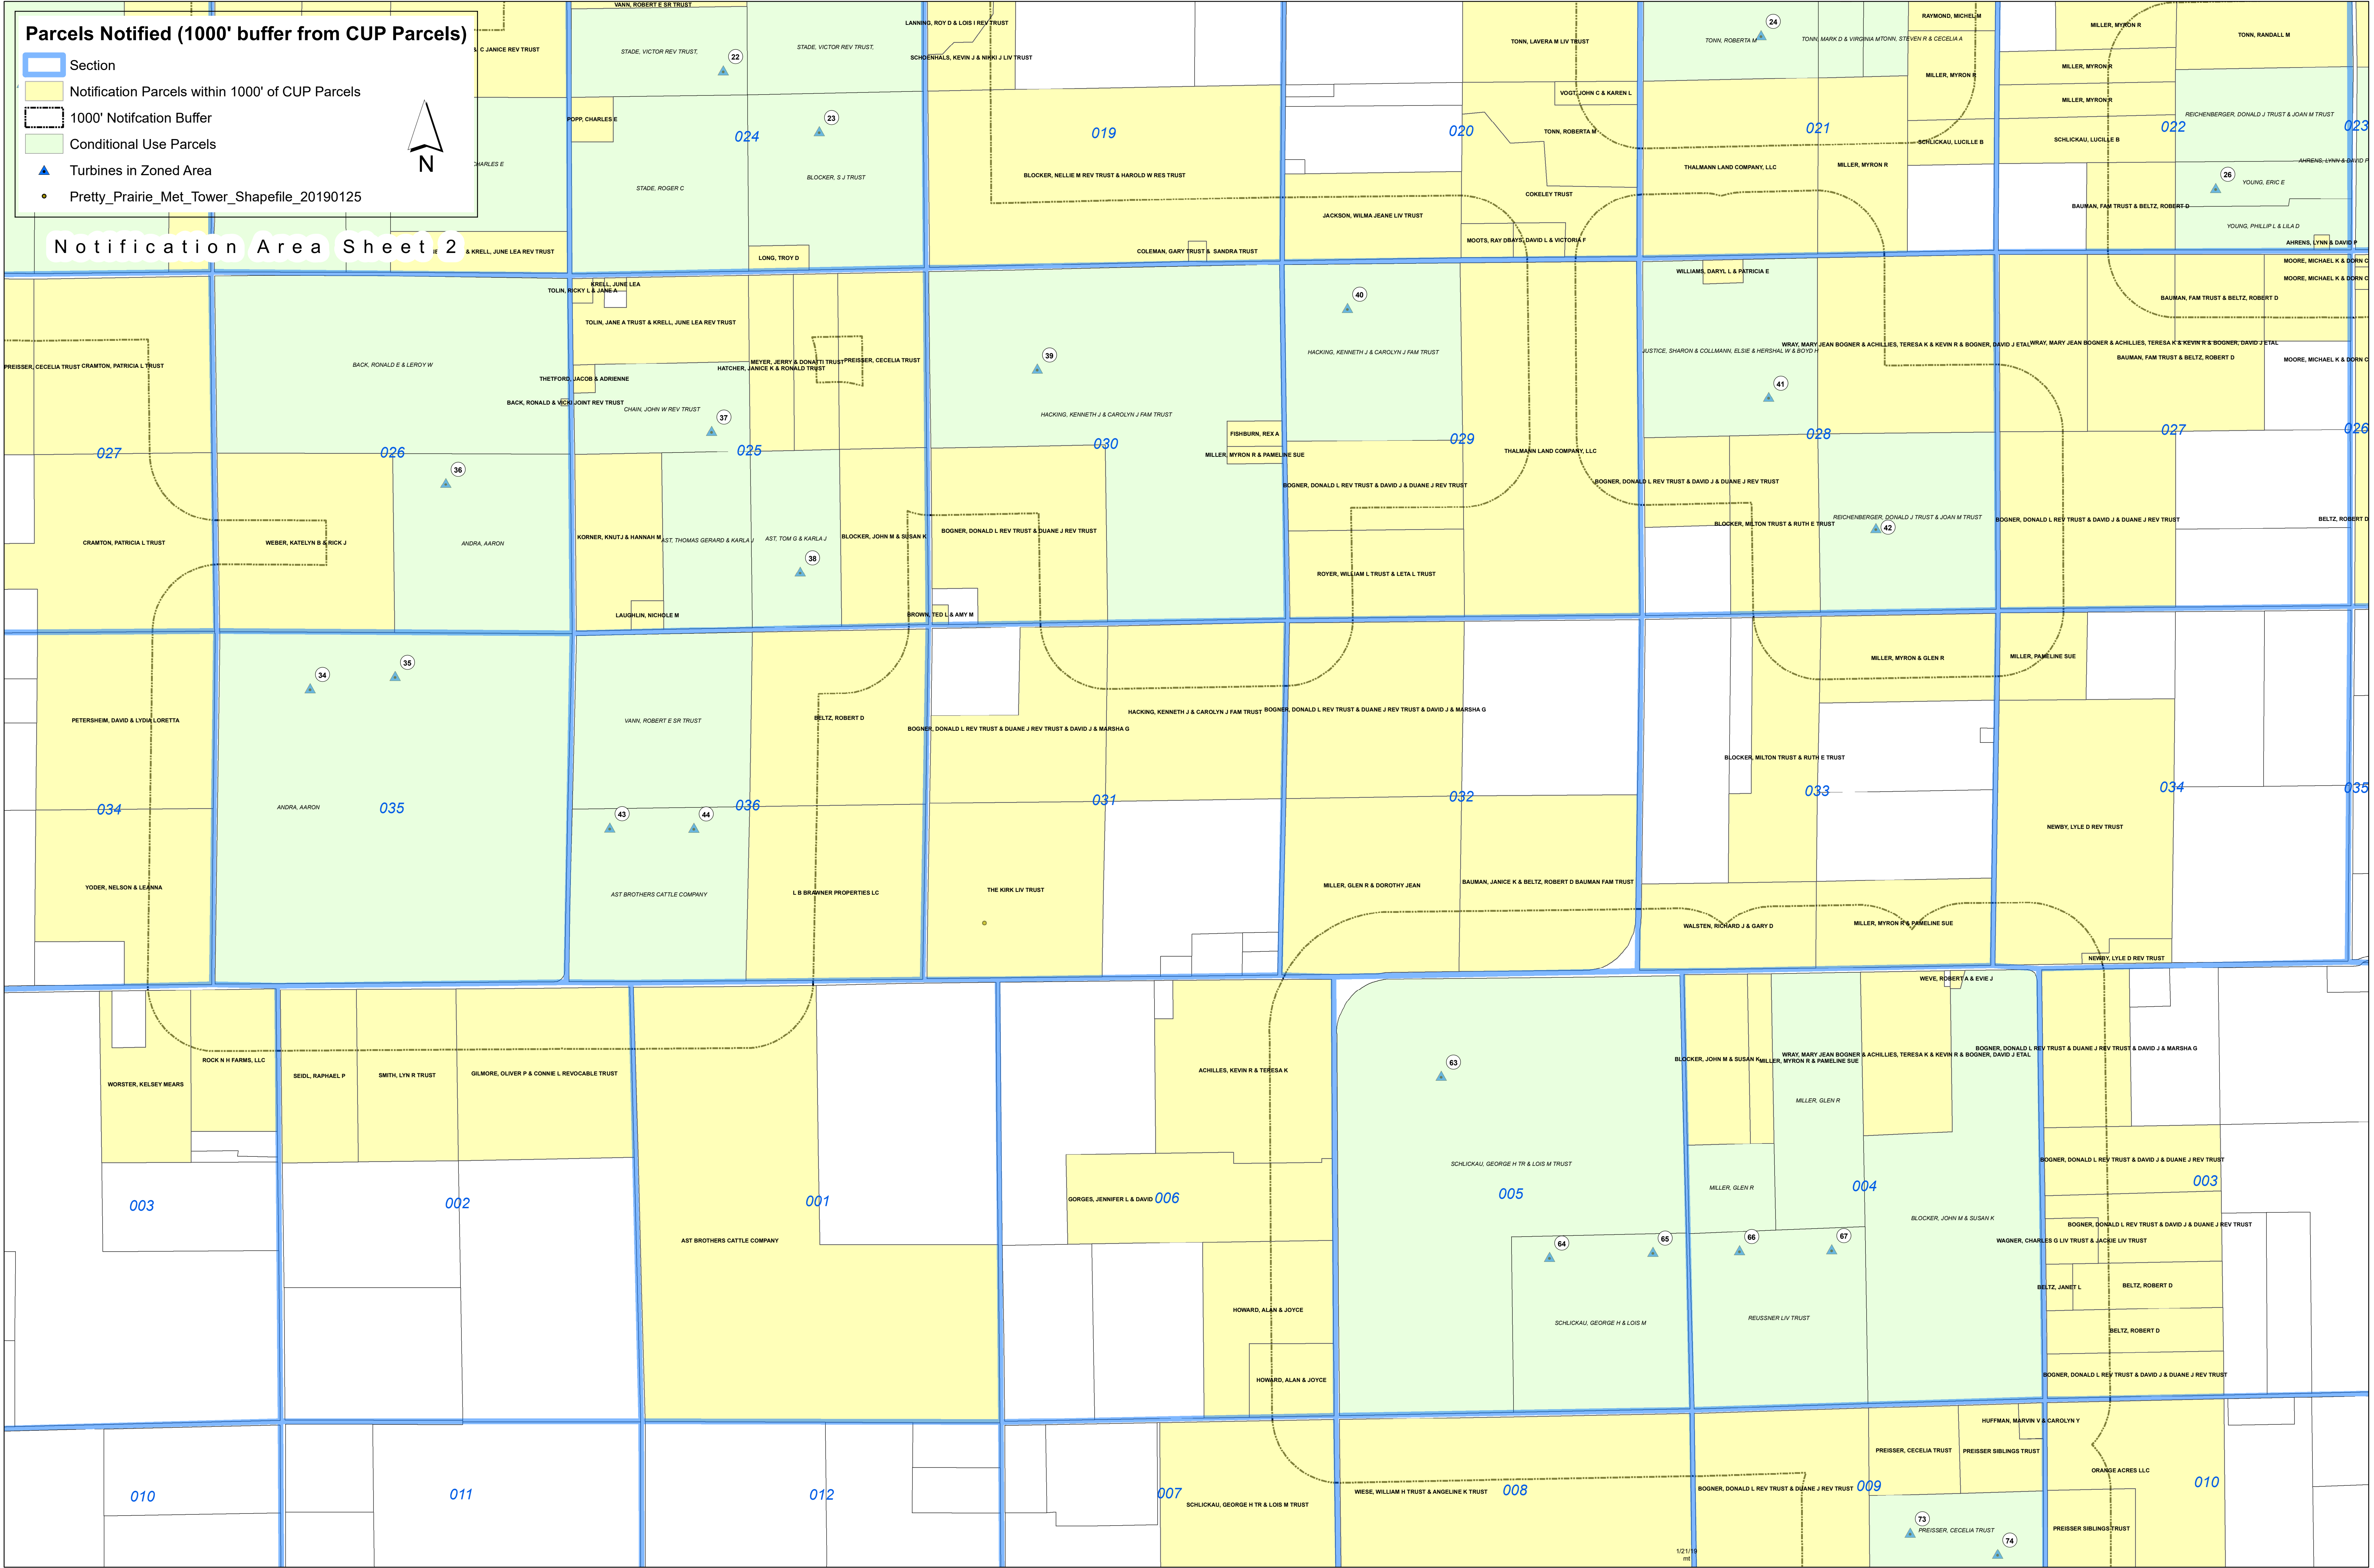

- I. *The general amount of vacant land that currently has the same zoning classification proposed for the subject property, particularly in the vicinity of the subject property, and any special circumstances that make a substantial part of such vacant land available or not available for development:* The application does not contain any proposals relating to vacant land. In addition, as detailed in the application, the property within the project area satisfies the unique physical and technical requirements necessary for the proper siting of a wind energy conversion system.
- J. *The recommendations of permanent or professional staff:* Pretty Prairie Wind has and will continue to work in coordination with County staff.
- K. *Whether the proposed amendment would be in conformance to and further enhance the implementation of the Comprehensive Plan:* The Reno County Comprehensive Plan contemplates the potential installation of a wind energy conversion system in Reno County, noting that “[t]he location of these facilities should be left to the open marketplace and investment decisions of the developers of such systems to determine the most acceptable locations, with the County retaining the final decision through the conditional use permit approval process. These special land uses are typically consistent with all other ‘non-agricultural’ and ‘non-residential’ land use decisions under the Zoning Regulations.”
- L. *Whether the relative gain to the public health, safety, and general welfare outweighs the hardship imposed upon the applicant by not upgrading the value of the property by such a reclassification:* No reclassification is being proposed as part of this application, and wind energy is currently contemplated as an enumerated conditional use in an agricultural district pursuant to the Reno County Zoning Ordinances. Also, the Pretty Prairie Wind Energy Center will enhance the public health, safety and general welfare through the creation of jobs, economic activity, and public and private revenue while also benefitting the owners of the property on which the project is located.
- M. *Such other factors as may be relevant from the facts and evidence presented in the application.* Pretty Prairie Wind requests that the County take into consideration all of the factors set forth in this application, and looks forward to working with the County as it processes this request. Upon the completion of this review, Pretty Prairie Wind respectfully requests the County’s approval of the Pretty Prairie Wind Energy Center.

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)

02/14/2019

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

Appendix D: COMPLAINT RESOLUTION SUMMARY & FORM

COMPLAINT RESOLUTION SUMMARY | Reno County

Prior to the start of construction of the project, Pretty Prairie Wind, LLC ("*Pretty Prairie Wind*") shall post information at a public location or web page in coordination with the County to inform residents and businesses of an e-mail address, street address, and a telephone number where they can contact *Pretty Prairie Wind* with questions, concerns, or complaints related to the Project.

The Plant Manager or project representative shall make reasonable efforts to respond to inquiries from residents and businesses within 48 hours (during normal business hours) of receipt of an inquiry. A record, including any complaints received, the resolution of such complaints, and any unresolved complaints, shall be maintained. The record will include steps implemented to resolve complaints. A report of all complaints and resolutions to complaints shall be filed with the Reno County designated party on a yearly basis.

Any confirmed problems will be corrected as soon as practical. In cases where a resolution cannot be delivered within 30 days, a timeline and measures to be taken will be provided to the complainant.

Complaint resolution process is intended to be implemented at the start of construction and to continue throughout duration of the project.

Pretty Prairie Wind
Visual Assessment Report

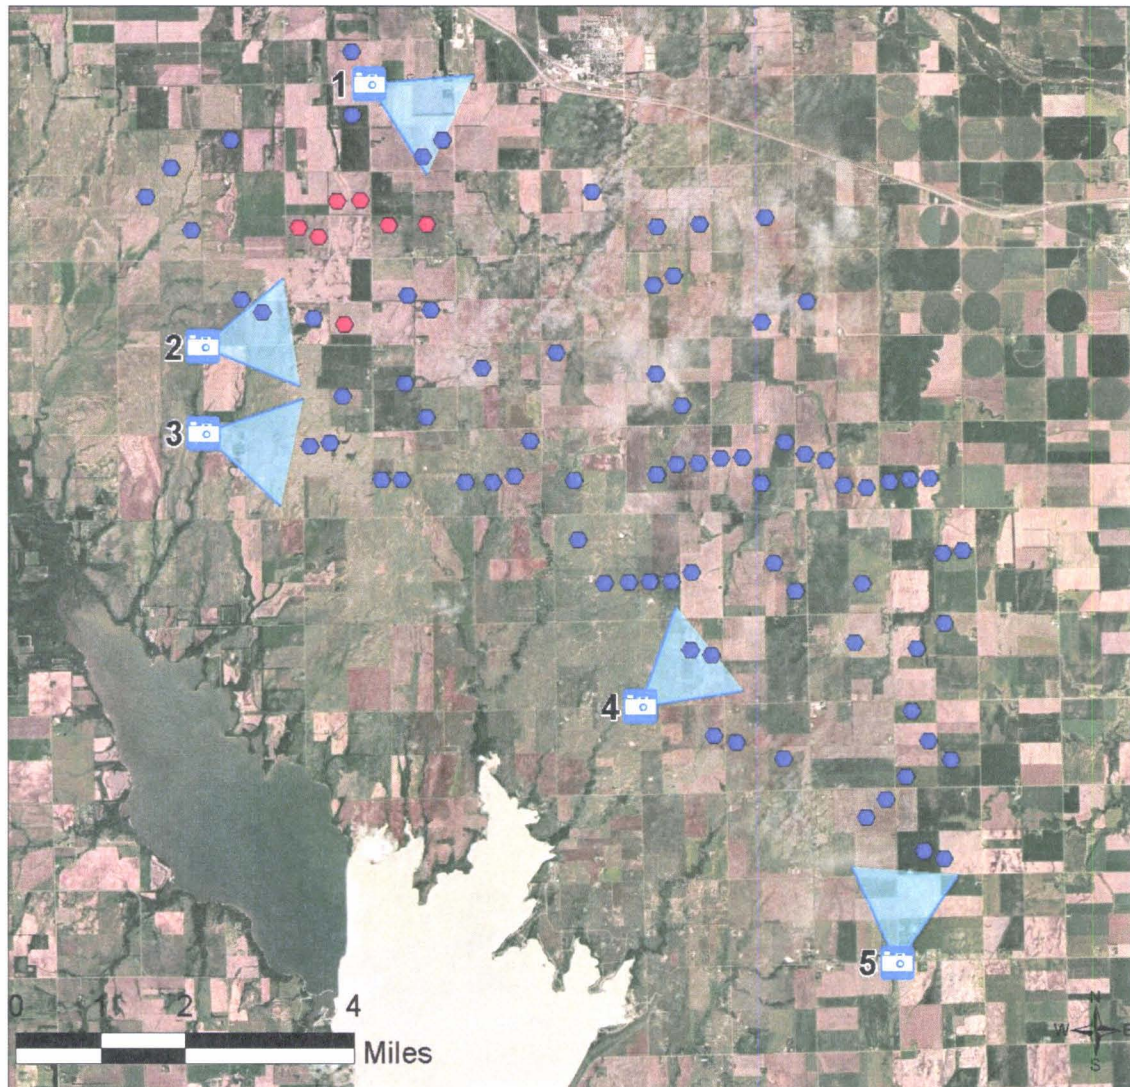

February 13, 2019

WindLogics®

Pretty Prairie Wind Visual Assessment

WindLogics engaged in a photo simulation of the potential visual impact of Pretty Prairie Wind. Photos were taken throughout the site in January 2019. Using the WindFarmer 4.2 software package, turbine locations are super-imposed on the photos to create a representative view of the turbines once installed. Five photo locations, identified in the map shown below, are included with before and after photos.

Photo simulation locations and view angles

-  GE2.3-116-80 Turbine
-  GE2.5-127-89 Turbine
